See the group project specification for guidelines and requirements regarding the video, report and code, and make sure to follow them. As a project like this allows for many possible solutions, it is impossible to define very detailed marking criteria. However, as a general guideline, marking will be based on the soundness and originality of the developed methods, the rigorousness of their evaluation, and the comprehensiveness of the results and discussion. Marking will not be based on the values of the performance metrics obtained.
